

# CALL FOR PAPERS

**ICEIMT 2020**  
**Oct 29-30, 2020**  
**Los Angeles, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEIMT 2020 : International Conference on Electrical Installation and Maintenance Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electrical Installation and Maintenance Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

|  |                                       |
|--|---------------------------------------|
| Electrical installations                           | Wiring techniques                     |
| Electrical installation and engineering            | The 3-phase induction motor           |
| Electrical installation and maintenance technology | Transformers                          |
| Protection, control and electrical devices         | Power-factor improvement              |
| Electromagnetism                                   | Earthing and earth-leakage protection |
| Inductance   | Testing                               |
| Charges  | Illumination                          |
| Insulators and conductors                          | Heating                               |
| D.C. circuits and A. C. Circuits                   | Communication systems and equipment   |
| Voltage drop and current rating                    | Electronics                           |
| 3-phase voltage-drop calculations                  | Management                            |
