

CALL FOR PAPERS

ICIAMCA 2020
Oct 29-30, 2020
Los Angeles, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIAMCA 2020 : International Conference on Industrial Automation and Motion Control Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Industrial Automation and Motion Control Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Industrial automation	Industry, military and space applications
Increase quality and flexibility of manufacturing process	Network based systems
Advantages of industrial automation	Recent developments in automation and control
Disadvantages of industrial automation	Recent trends in control systems
Industrial robotics	Linear and nonlinear control systems
Industrial automation software	Optimization and optimal control
Automatic control	Intelligent control
Instrumentation and control components	Robust control
Control systems and applications	Neuro-fuzzy control
Biomedical instrumentation and applications	Adaptive control
Process control and instrumentation	Systems and automation
Mechatronics	Sampled-data control systems and digital control
Networking and broadcasting	Advanced control techniques
