

CALL FOR PAPERS

ICMGENA 2020
Oct 29-30, 2020
Los Angeles, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMGENA 2020 : International Conference on Marine Geotechnical Engineering and Numerical Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Marine Geotechnical Engineering and Numerical Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine geotechnical engineering	Skirted mudmats for sea floor structures
Marine ground investigations	Shallow gbs foundations
Foundation design	Numerical analysis
Modeling of cyclic soil response	Pile design
Shallow foundations	Risk analysis
Geotechnical and geophysical offshore site investigations	Deep water
Offshore foundation design for monotonic and cyclic loading	Future directions
Anchoring systems	Techniques for marine geotechnics
Pipeline route assessment	Offshore geotechnical engineering
Pile drivability assessment and testing	Applications of offshore geotechnical engineering
Conductor installation	Soil mechanics
Spudcan-pile interaction analysis	Offshore soil mechanics
Suction caisson design and installation	Offshore geotechnics
