

# CALL FOR PAPERS

**ICWCSP 2020**  
**Oct 29-30, 2020**  
**Los Angeles, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWCSP 2020 : International Conference on Wireless Communications and Signal Processing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wireless Communications and Signal Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Future Internet and next-generation networking architectures
- Heterogeneous multi-layer and multi-domain networks
- Wireless-wireline internetworking
- Overlay networks, content-centric networks, and peer-to-peer networking
- Data center networking
- Software-defined networking
- Mobile cellular networks
- Mobile ad hoc networks
- Wireless mesh networks
- Wireless sensor networks
- Wireless local area networks
- Wireless personal area networks
- Cognitive radio networks
- Self-organizing networks
- Vehicular ad hoc networks
- Smart grid networks
- Home area networks
- Algorithms and protocols
- Medium access control
- Routing
- Security and privacy
- Flow control and congestion control
- Network resource allocation
- Traffic modeling and management
- Mobility, handoff, and location management
- Quality-of-service provisioning
