

CALL FOR PAPERS

ICLEWTCM 2020
Oct 29-30, 2020
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICLEWTCM 2020 : International Conference on Lifetime Extension of Wind Turbines and Condition Monitoring is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Lifetime Extension of Wind Turbines and Condition Monitoring. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

End-of-life issues of wind turbines
End-of-life issues of wind farms
Operations and maintenance
New operational strategies
Wind turbine assessment
Novel condition monitoring techniques

Novel health structural assessment
Safety and risks associated to lifetime extension
Influence of reliability and availability on lifetime extension
Analysis of the age of the wind turbine fleet in different locations, regions, countries, and/or geographical areas
Economic analyses (CAPEX, OPEX, COE, etc.) towards decision making
