

CALL FOR PAPERS

ICUSTICM 2020
Oct 05-06, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUSTICM 2020 : International Conference on Urban Simulation Technologies and Integrated Comprehensive Models is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Urban Simulation Technologies and Integrated Comprehensive Models. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Urban simulation technologies
- Urban simulation and design
- Digital urban modeling
- Methods, models and planning applications
- Applications
- Architecture
- Engagement
- Land use, transportation, and environmental planning
- Urban simulation models
- Model - building process
- Data analysis

- Calibration and prediction
- Modelling types and styles
- Land use transportation models
- Spatial interaction
- Discrete choice theory
- Integrated comprehensive models
- Lowry models
- Contemporary urban land use models
- Climate change and energy predictions in models
- Modelling urban morphology
