

CALL FOR PAPERS

ICEPM 2020
Nov 05-06, 2020
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEPM 2020 : International Conference on Evolutionary Processes and Mutation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Evolutionary Processes and Mutation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Evolutionary biology
Evolution
Molecular evolution
Composition of cellular molecules
such as DNA, RNA and proteins
across generations
Mutation
Recombination
Gene conversion
Genome size
Repetitive elements
Chromosome number and organization
Gene content and distribution
Organelles
Origins of new genes

Molecular phylogenetics
The driving forces of evolution
Protein evolution
Evolutionary processes
Diversity of life on Earth
Origin of life
Descent of species
The origin of new species
Genetics, ecology, systematics and
paleontology
Genetic architecture of adaptation
Natural selection
Sexual selection
Genetic drift and biogeography
