

CALL FOR PAPERS

ICPRA 2020
Nov 05-06, 2020
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPRA 2020 : International Conference on Pattern Recognition Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Pattern Recognition Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Pattern recognition
Machine learning
Evaluation
Recognition and consciousness
Representation
Error estimation
Model learning and estimation
Bayesian approach to pattern recognition
Human and machine perception
Pattern recognition applications
Decision process
Selecting features
Minimizing risk

Multiple features
Decision boundaries
Character recognition
Optical character recognition
Unsupervised learning and clustering
Data acquisition and sensing
Feature extraction
Pre-processing
Post-processing
Expert systems
Probability density estimation
Statistical pattern recognition
Model complexity
