

# CALL FOR PAPERS

**ICWCA 2020**  
**Nov 05-06, 2020**  
**Amsterdam, The Netherlands**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWCA 2020 : International Conference on Wood in Construction and Architecture is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wood in Construction and Architecture. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wood design  
Parametric design and fabrication strategies  
CNC and woodworking technology  
Wood stereotomy and descriptive geometry  
Wood joint systems  
Flexible wood  
Complex timber structures  
Parametric timber engineering

Large-scale cross-laminated timber projects  
Wood complex surface  
Discretization of surface  
History of representation in wood design  
Optimization of wood architectures  
Wood and geometry in the history  
Wooden architectures and timber structures survey
