

CALL FOR PAPERS

ICMSBSD 2020
Nov 05-06, 2020
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSBSD 2020 : International Conference on Multi-Storey Buildings and Structural Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Multi-Storey Buildings and Structural Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Residential multi-storey buildings
High-rise building
Anatomy of multi-storey buildings
Structural analysis and design of tall buildings
High-rise building structures
High-rise structural systems
Structural analysis of regular multi-storey buildings
Seismic design of multi-storey buildings
Architectural design
Structural design

Possibilities of the building system
Principles of building acoustics
Principles of fire design
Principles of controlling deformations and cracking
Principles of seismic design
Frame element production information
Environmental impacts of multi-storey buildings using different construction materials
Structural fire design of multi-storey buildings
Applications
Innovative seismic solutions for multi-storey buildings
