

# CALL FOR PAPERS

**ICAAEM 2020**  
**Nov 19-20, 2020**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAAEM 2020 : International Conference on Advanced Aerospace Engineering and Mechatronics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Aerospace Engineering and Mechatronics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advanced theoretical models	Aviation human factors
Advances in aerospace technology	Computational fluid dynamics
Aeroelasticity and loads	Emerging avionics technology
Aerodynamic's fundamental concepts	Heat transfer mechanics
Aerospace robotics and mechatronics	Navigation systems
Flight software engineering and testing	Novel aero engines
Aerostructures and composites	Rocket theory and design
Aeronautics and astronautics	Spacecraft avionics systems, subsystems and technologies
Aircraft systems	Unmanned aircraft technologies
Aircraft design concepts	Aerodynamic forces and structural flexibility
Applied aerodynamics and fluid mechanics
