

CALL FOR PAPERS

ICCNSFET 2020
Nov 19-20, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCNSFET 2020 : International Conference on Carbon Nanotube Sensors and Field Effect Transistor is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Carbon Nanotube Sensors and Field Effect Transistor. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Carbon nanotube sensors
CNT synthesis
Field effect transistor
Contact resistance
Composite materials
Sensor design and characterization
Electrochemical sensors
Biosensors

Chemical sensors
Gas sensors
Strain sensors
Pressure sensors
Flow sensors
Mass sensors
pH sensors
