

CALL FOR PAPERS

ICEEWSN 2020
Nov 02-03, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEEWSN 2020 : International Conference on Energy Efficient Wireless Sensor Networks is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energy Efficient Wireless Sensor Networks. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energy efficient wireless sensor networks
Energy efficient communication protocols
Quality of service support
Medium access control in wireless sensor networks
Clustering for energy efficiency in wireless sensor networks
Power management in sensor node
Energy harvesting issues in wireless sensor networks
Wireless sensor network security
Multimedia secure data aggregation and intelligent data processing
Efficient middleware design and implementation

Application of intelligent systems to improve energy
Novel applications: healthcare, home automation, traffic monitoring, etc.
Power efficiency in wireless sensor networks
Scalability in wireless sensor networks
Wireless sensor networks responsiveness
Reliability in wireless sensor networks
Mobility in wireless sensor networks
Sensor nodes architecture
Operating systems
