

CALL FOR PAPERS

ICHMT 2020
Nov 02-03, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHMT 2020 : International Conference on Hospital Medical Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Hospital Medical Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|--|---|
| Hospital engineering innovations | Basic health technology frameworks |
| Medical technology innovations | Health information technology |
| Health information technology innovations | Costs and benefits of health information technology |
| Medical equipment innovations | Problems with health information technology |
| Imaging technology | Health care quality or effectiveness |
| Innovations in medical imaging and virtual microscopy | Health care productivity or efficiency |
| Medical technology management | Medical errors and health care accuracy |
| Health technology assessment of medical devices | Health care costs |
| Health technology regulation | Administrative efficiencies and healthcare work processes |
| Health technology assessment in health systems | Clinical point of care technology |
| International collaboration in health technology assessment | Technological innovations, opportunities and challenges |
| Challenges for using health technology assessment in developing and emerging countries | Patient billing |
| Strategies for developing health technology assessment | Accounting systems |
