

CALL FOR PAPERS

ICMCCA 2020
Nov 02-03, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMCCA 2020 : International Conference on Mathematics, Computation and Complex Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mathematics, Computation and Complex Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mathematics	Probability
Analysis	Complex analysis
Continuous maths	Metric spaces
Groups and group actions	Number theory
Mathematics and computing	Communication theory
Computational model	Model theory
The interplay of modeling and computational mathematics	Category theory
Nonlinear differential-difference models	Lie groups
Corruption suppression models	Probabilistic combinatorics
Homotopy analysis	Logic and proof
Complex numbers	Concurrent algorithms and data structures
University maths	Algebra
Linear algebra	Probability and statistics
