

CALL FOR PAPERS

ICTSS 2020
Nov 02-03, 2020
San Francisco, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTSS 2020 : International Conference on Transportation Science and Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Transportation Science and Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Transportation science
Transportation technology
Transportation planning and design
Supply chain management
Operations research techniques
Transportation sectors
Transportation, logistics and rail transport
Aviation, railroads, highways traffic
Public transportation, and military transport
Transportation planning
Transportation systems
Transportation systems design
Innovative roadway materials

Innovative railroad engineering and technology
Transportation planning and network growth
Geometric impacts on traffic operations
Traffic engineering and safety
Signal control and traffic impact analysis
Urban street parking and parking management
Traffic safety under poor weather conditions
Traffic simulation for operating a network under abnormal conditions
Traffic safety and operations of two-lane highways, expressways, and freeways,
Traffic collision countermeasures and safety devices
Vehicle routing
Waiting strategies
Bidding systems
