

CALL FOR PAPERS

ICCANC 2020
Nov 19-20, 2020
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCANC 2020 : International Conference on Construction Automation and Numerical Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Construction Automation and Numerical Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Construction automation	Network communication
Robotics and automation in construction	Application of computer-integrated construction
Post-parametric automation in design and construction	Emerging technologies
Construction technologies	Construction robot path planning
Building automation system design and construction standards	Recent research and applications
Fixed construction automation	Automated stone cutting
Programmable construction automation	Steel bridge deck welding
Computer-integrated construction	Excavation
Construction robots	Large-scale manipulators
Numerical control	Interior finishing robot
Geometric modeling	Exterior building finishers
Automated material management	Automated slab placing and finishing
