

# CALL FOR PAPERS

**ICCASL 2020**  
**Nov 19-20, 2020**  
**Singapore, SG**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCASL 2020 : International Conference on Complex Adaptive Systems and Learning is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Complex Adaptive Systems and Learning. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Complex adaptive system	Connectivity
General properties	Co-evolution
Characteristics	Sensitive dependence on initial conditions
Emergence and self-organization	Emergent order
Techniques and analysis	Far from equilibrium
Modeling and simulation	State of paradox
CAT and AAT model	Aggregation of model
Evolution of complexity	Test problem generation
Intellectual figures	Agent-based simulation
Learning and complex adaptive systems	Evaluation: application of complex adaptive system to engineering systems
Attributes of complex adaptive system	Practice and theory
Distributed control
