

CALL FOR PAPERS

ICCCA 2020
Nov 19-20, 2020
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCA 2020 : International Conference on Coordination Chemistry and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Coordination Chemistry and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Molecular and Sustainable
Materials
Catalytic Organometallics
Metal Complexes in Molecular
Electronics
Metals and Metal Complexes in
Nanoscience & Nanotechnology
Properties of f-block Metals
(Phosphors)
Frontiers in Inorganic Chemistry
Frontier and Perspectives in
Functional Molecule-Based Magnets
Crystal Engineering And
Supramolecules
Emerging Investigators in
Metal-Organic Frameworks
Functional MOF

Multiple Ligands in Coordination
Polymers
Polyoxometalate
New Aspects of Metal Cluster
Compounds
Supramolecular Coordination
Containers and Reactors
Synthesis and Catalysis
Frontier in Main Group Chemistry
- Synthesis and Application
New Aspects in Transition Metal
Catalysis
Novel Metal Catalysts and Catalytic
Reactions
Transition Metal Complexes in
Homogeneous Catalysis
Metal-catalyzed C H bond
functionalization
