

CALL FOR PAPERS

ICGME 2020
Nov 19-20, 2020
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGME 2020 : International Conference on Green Manufacturing Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Green Manufacturing Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mechanical Engineering Design
Emerging Design Theory and Methodology
Creativity and Innovation in Design
Theory for Sustainable Product Development
Virtual Design
CAD, CAM, CAE
Green Environment Design
Smart Sensor and its Application
Micro/Nano Devices and Systems
Reliability, Stress Analysis
Green Manufacturing Technology
Remanufacturing, repair and reconditioning

Recycling techniques and use of reclaimed material
Lightweight structures and materials
Emerging Technologies in Manufacturing
Advances in Nontraditional Manufacturing
Virtual Manufacturing and Networked Manufacturing
Bio-manufacturing
Rapid Prototyping
Detection, Control, Diagnosis in Manufacturing
Applied Mechanics
Disaster Reduction and Defense Mechanics
Multibody System Dynamics
Dynamics, Vibration Deformation
