The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRCS 2020 : International Conference on Ratio Control Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ratio Control Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ratio control  
Ratio control architecture  
Ratio control systems and applications  
Ratio control systems in blending operations  
Ratio control in industrial automation and mechatronics

Feedforward and ratio control  
Ratio control system design and application  
Ratio control of discrete-time systems  
Digital ratio control
