

CALL FOR PAPERS

ICSAECAS 2020
Nov 19-20, 2020
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSAECAS 2020 : International Conference on Software Architecture, Engineering and Common Architectural Styles is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Architecture, Engineering and Common Architectural Styles. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computer software	Software architecture and agile development
Software architecture description	Software architecture erosion
Software architecture	Software architecture recovery
Architecture description languages	Design and implementation
Architecture viewpoints	Types of software
Architecture frameworks	Malicious software
Architectural styles and patterns	System software
Architectural design	Application software
Common architectural styles	Software patent
Pipes and filters	Software license
Data abstraction and object-oriented organization	Software development
Event-based, implicit invocation	Software industry
Layered systems	Industry and organizations
