

# CALL FOR PAPERS

**ICDSC 2020**  
**Nov 12-13, 2020**  
**Venice, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDSC 2020 : International Conference on Deep Sea Community is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Deep Sea Community. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Deep sea community ecology and synecology  
Ecology and biology of deep sea communities  
deep sea communities and evolutionary process  
deep sea communities in a changing environment  
Theories and approaches in community ecology  
Interspecific interactions in deep sea communities  
Ecological networks and community ecology  
Processes of deep sea communities

Components of an ecosystem  
Ecological efficiency  
Ecological pyramids in deep sea communities  
Macro-ecology and biogeography  
Networks and biotic interactions in deep sea communities  
Parasites, pathogens and disease in deep sea communities  
Predation, mutualism, commensalism and parasitism
