

CALL FOR PAPERS

ICMAEC 2020
Nov 12-13, 2020
Venice, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMAEC 2020 : International Conference on Multi-Access Edge Computing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Multi-Access Edge Computing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Multi-access edge computing
Radio resource management for multi-access edge computing
Task scheduling and computation resource management for multi-access edge computing
Virtualization and network slicing for multi-access edge computing
Location and sizing of computation and storage elements for multi-access edge computing
Communication protocols and network architectures for multi-access edge computing
Security, privacy, and reliability in multi-access edge computing
QoE and QoS provisioning in multi-access edge computing
5G/LTE/WiFi enabled multi-access edge computing

Energy management and green multi-access edge computing
Edge-to-cloud integration and protocols for multi-access edge computing
Human and social-driven design of multi-access edge computing
Multi-access edge computing applications
Video analytics
Location services
Internet-Of-Things (IoT)
Augmented reality
Optimized local content distribution and data caching
