

CALL FOR PAPERS

ICCCMS 2020
Dec 01-02, 2020
Auckland, New Zealand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCMS 2020 : International Conference on Composite Chemistry and Materials Science is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Composite Chemistry and Materials Science. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Composite chemistry
Chemical engineering applications
for composite development
Composite materials and structures
Natural fibre composites
Reinforced composites system
Nanocomposites
Hybrid composites system
Composites engineering designs and
modelling
Composites engineering and
applications
Physical and mechanical composites
testing
New matrix system
Polymer composites interphase
Future and trends of the composites
materials and technologies

Composites manufacturing processing
and techniques
Composites fillers and properties
Composites for inflatable
structures
Thermo-plastics
Manufacturing process developments
Enhancement of properties by doping
with CNT or nano carbon fibers
Grid/lattice composite structures
Propellant tank applications,
including liners
Interface design technologies
Green composites
Lightweight structures
Nanocomposites
High performance concretes
