

# CALL FOR PAPERS

**ICCCMS 2020**  
**Dec 01-02, 2020**  
**Auckland, New Zealand**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCMS 2020 : International Conference on Composite Chemistry and Materials Science is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Composite Chemistry and Materials Science. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Composite chemistry  
Chemical engineering applications  
for composite development  
Composite materials and structures  
Natural fibre composites  
Reinforced composites system  
Nanocomposites  
Hybrid composites system  
Composites engineering designs and  
modelling  
Composites engineering and  
applications  
Physical and mechanical composites  
testing  
New matrix system  
Polymer composites interphase  
Future and trends of the composites  
materials and technologies

Composites manufacturing processing  
and techniques  
Composites fillers and properties  
Composites for inflatable  
structures  
Thermo-plastics  
Manufacturing process developments  
Enhancement of properties by doping  
with CNT or nano carbon fibers  
Grid/lattice composite structures  
Propellant tank applications,  
including liners  
Interface design technologies  
Green composites  
Lightweight structures  
Nanocomposites  
High performance concretes
