

CALL FOR PAPERS

ICDMMM 2020
Dec 10-11, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDMMM 2020 : International Conference on Design, Materials, Metallurgy and Manufacturing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Design, Materials, Metallurgy and Manufacturing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Materials behavior	Meso/micro manufacturing equipment and processes
Casting and solidification	Modeling, analysis, and simulation of manufacturing processes
Powder metallurgy and ceramic forming	Computer-aided design, manufacturing, and engineering
Surface, subsurface, and interface phenomena	Semiconductor materials manufacturing
Coatings and surface engineering	Laser based manufacturing
Composite materials	Precision molding processes
Materials forming	Joining processes
Machining	Rapid manufacturing technologies
Nanomaterials and nanomanufacturing	Nontraditional manufacturing
Biomedical manufacturing	Nanofabrication, nanometrology and applications
Environmentally sustainable manufacturing processes and systems	Metrology and measurement
Manufacturing process planning and scheduling
