

# CALL FOR PAPERS

**ICSESSE 2020**  
**Dec 10-11, 2020**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSESSE 2020 : International Conference on Stretchable Electronics and Storage in Stretchable Electronics is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Stretchable Electronics and Storage in Stretchable Electronics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Stretchable electronics  
Flexible and stretchable  
electronics for biomedical  
applications  
Multifunctional smart sensors  
Battery free electronic devices  
Wireless electronic devices

Power supply in stretchable  
electronics  
Generation in stretchable  
electronics  
Storage in stretchable electronics  
Scalable high throughput and facile  
fabrication procedures for the  
realization of scientific  
technological growth and  
development  
Robust and reliable novel  
geometrical designs for high  
performance stretchable electronic  
devices
