

CALL FOR PAPERS

ICACEM 2020
Dec 10-11, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACEM 2020 : International Conference on Advanced Coastal Engineering and Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Coastal Engineering and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Coastal engineering	
Coastal, harbour and offshore engineering	
Waves, currents and sediment transport	
Coastal, estuarine and offshore morphology	Coastal waves
Technical and functional design of coastal and harbour structures	Nearshore currents
Morphological and environmental impact of coastal, harbour and offshore structures	Coastal structures
Applications of coastal engineering	Sediment transport
Mathematical and numerical modelling	Coastal morphology
Laboratory and field observations and experiments	Beach nourishment
	Coastal management
	Design and planning of coastal works
