

# CALL FOR PAPERS

**ICAEE 2020**  
**Dec 10-11, 2020**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAEE 2020 : International Conference on Atmospheric Electricity and Electrostatics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Atmospheric Electricity and Electrostatics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Atmospheric electricity	Lightning and atmospheric phenomenology
Atmospheric electricity and cloud microphysics	Fuel tanks and fuel systems
Thunderstorms and global electrification	Lightning protection of materials, devices and systems
Atmospheric ionisation and electrification	Lightning induced effects
Direct influences of electrification and radioactivity on clouds	Electrostatics
Weather electricity	Lightning standards and safety
Electrical conductivity	Wind turbines, photovoltaic systems and other electric power systems
Electrical field	Automobile, train, and other vehicles
Precipitation static on aircraft and emc	Space craft and launch complex
Lightning zoning	Numerical modelling and analysis
Lightning direct effects	Lightning damage repair and maintenance
Lightning physical effects and observation	Winter lightning
