

CALL FOR PAPERS

ICNRFC 2020
Dec 03-04, 2020
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNRFC 2020 : International Conference on Networked Robotics and Future Challenges is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Networked Robotics and Future Challenges. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Networked robotics	Wave-variable framework
Networked robotic systems	Intelligent networked robot systems
Network robot systems	for symbiotic interaction
Interaction mechanisms	Scientific and technical
Control of networked robotic	challenges
system	Future challenges
Synchronization of networked	Human-robot detection and
robotic systems	localization
Task-space synchronization	Waving recognition
Realistic simulation of networked	Decision-making under uncertainty
multi-robot systems	Integrated experiments
Connectivity awareness in networked	Task allocation
robotic systems	Sensor selection
Nondeterministic modeling and	
verification	
Cooperative control of networked	
robotic systems
