

CALL FOR PAPERS

ICCCNS 2020
Dec 24-25, 2020
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCNS 2020 : International Conference on Computer Communications and Networks Security is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer Communications and Networks Security. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computer Networks
Computer Networking
Mobile and Wireless Technologies
(UWB, MIMO, WiMAX, etc.) and
Networks
Radio Wave Propagation (modelling,
channel measurements and
characterisation)
Software Defined Radio
Application of FPGA and DSP in
Communication Devices and Networks
Ad-hoc Networks
Signal Processing for Wireless
Communications
Modulation, Coding and Multiple
Access Schemes in Communications
Internet and Intranet Technologies
and Services
Intelligent Spatial and Co-located
Data Access and Management
Information Theory and Coding
Theory
Networking Theory and Technologies

Antennas Simulation, Design,
Measurements and Applications
Microwave (RF) System Simulations,
Design, Build and Measurements
Network and Data Security
Hardware and Software Applications
Communication Protocols and
Standards
University-Industry Collaboration
or Knowledge Transfer Activities
Network Architecture
Network Interfaces
Network Reliability
Network Performance
Network Management
Network protocols
Quality Service Issues
