

CALL FOR PAPERS

ICDNS 2020
Dec 24-25, 2020
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDNS 2020 : International Conference on Data Networking and Security is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Data Networking and Security. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Data networks
Data networks, IP and the internet
Communication technology
Applications of data networks
Data link control and communication channels
Delay models in data networks
Multiaccess communication
Routing in data networks
Flow control
The internet, email, e-business and the worldwide web
Data communication and packet switching

Data networks and protocols
Local area networks
Wans, routers and the internet protocol
Routing tables and protocols
Transport services and protocols
IP networks in practice
Managing the network
Data networking and internet applications
Data network security
Network performance and optimization
