

# CALL FOR PAPERS

**ICFRA 2020**  
**Dec 24-25, 2020**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFRA 2020 : International Conference on Forest Regeneration and Adaptation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Forest Regeneration and Adaptation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Forest restoration and regeneration  
Forest regeneration and ecosystem  
Ecological knowledge  
Biodiversity-productivity relationships  
Mixed forests  
Competition and facilitation  
Plant-plant / plant-animal /plant-fungus interactions  
Regeneration dynamics and natural regeneration  
Eco-techniques for plant protection and establishment  
Understanding seedling establishment  
Genetics and restoration under global change  
Seedling quality  
Plant production

Producing stress-tolerant seedlings  
Site preparation for restoration  
Direct seeding  
Protection from browsing animals  
Restoring forests after wind and fire regimes  
Large scale forest restoration efforts following pests and diseases  
Restoration of forest landscapes following anthropogenic disturbances  
Assessing the effects of forest restoration  
Cost-effective forest restoration  
Forest adaptation and restoration  
Forest restoration for biodiversity conservation  
Retention forestry  
Forest policy for restoration
