

# CALL FOR PAPERS

**ICICTTS 2020**  
**Dec 24-25, 2020**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICICTTS 2020 : International Conference on ICTs for Transportation Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of ICTs for Transportation Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

ICT and intelligent transportation systems  
Advances and challenges in intelligent transportation  
Present and future challenges of ICT for intelligent transportation technologies  
ICTs and intelligent transportation systems  
Intelligent transportation systems  
Advanced driver assistance systems  
Networked traffic infrastructure  
Electronic toll collection  
Electronic freight management  
Management of intelligent transportation systems  
Intelligent transportation systems for sustainable development  
Intelligent transportation communication systems  
Inter-vehicle and intra-vehicle communications

Cooperative transportation systems  
Mobility management technologies  
In-vehicle bus systems  
Artificial transportation systems  
Advanced public transportation management  
Ports, waterways, inland navigation, and vessel traffic management  
Modelling, simulation, and control of pedestrians and cyclists  
Air, road, and rail traffic management  
ITS user services  
Emergency management  
Transportation networks  
Emissions, noise, environment  
Management of exceptional events: incidents, evacuation, emergency management
