

CALL FOR PAPERS

ICSMA 2020
Dec 24-25, 2020
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMA 2020 : International Conference on Symbiotic Mechatronics and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Symbiotic Mechatronics and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Fundamentals; differences and benefits towards "classic" mechatronic systems
Applications that exhibit a symbiotic structure
Transdisciplinary applications

Simulation of symbiotic mechatronic systems
Formalisms to incorporate symbionts into mechatronic frameworks
Future developments and visions
