

CALL FOR PAPERS

ICTDDN 2021
Jan 21-22, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTDDN 2021 : International Conference on Targeted Drug Delivery and Nanocarriers is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Targeted Drug Delivery and Nanocarriers. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Drugs encapsulated in nanoparticles
or drugs coupled to macromolecules
with a bound targeting agent
Contact-facilitated drug delivery
using liposomes and binding or
interaction with the targeted cell
membrane
Soluble polymers or biodegradable
microsphere polymers that target
delivery of bioactive factors or
drugs

Multi-composite drug delivery
system such as metal NP
Medical devices, such as catheters
or sutures, that incorporate
nanoparticles to the target organ
or tissues
