

# CALL FOR PAPERS

**ICACSR 2021**  
**Jan 14-15, 2021**  
**Bali, Indonesia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACSR 2021 : International Conference on Adaptive Control Systems and Regulation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Adaptive Control Systems and Regulation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Adaptive control	Open-loop adaptive control
Parameter estimation	Direct adaptive control
Classification of adaptive control techniques	Indirect adaptive control
Applications	Iterative identification in closed loop and controller redesign
Adaptive control versus conventional feedback control	Multiple model adaptive control with switching
Fundamental hypothesis in adaptive control	Adaptive regulation
Adaptive control versus robust control	Adaptive feedforward compensation of disturbances
Basic adaptive control schemes	Parameter adaptation algorithm
