

CALL FOR PAPERS

ICCBSEAOR 2021
Jan 14-15, 2021
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCBSEAOR 2021 : International Conference on Component-Based Software Engineering and Aspect-Oriented Requirements is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Component-Based Software Engineering and Aspect-Oriented Requirements. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Component-based software engineering
Characteristics of components
Design principles
Component models
Component development for reuse
Component-based development process and component lifecycle
Technical concepts of component-based software engineering
Differences from object-oriented programming
Component-based development Architecture

Technologies
Independent components
Component standards
New challenges in software development
Component-based software engineering for embedded systems
Aspect-oriented requirements engineering for component-based software systems
Testing component-based software
Component-oriented programming
Reliability prediction for component-based software architectures
