

CALL FOR PAPERS

ICEMMMSI 2021
Jan 14-15, 2021
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEMMMSI 2021 : International Conference on Energetic Materials, Molecular Modeling and Structural Investigation is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energetic Materials, Molecular Modeling and Structural Investigation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energetic materials
Explosives and propellants
Low sensitivity energetic materials
Ionic energetic materials
Nanostructured energetic materials
Energetic materials synthesis
Energetic materials design

Molecular modeling of energetic materials
Structure and properties of energetic materials
Structural investigation of energetic materials
Computer-aided design of monopropellants
Polycyclic amine chemistry
Methods for preparing energetic nitro-compounds
Applications of energetic materials
