

# CALL FOR PAPERS

**ICESETE 2021**  
**Jan 14-15, 2021**  
**Bali, Indonesia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICESETE 2021 : International Conference on Electrolytic Separation and Electrochemical Technologies in Electrometallurgy is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electrolytic Separation and Electrochemical Technologies in Electrometallurgy. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Metallurgical engineering

Electrometallurgy

Processes of metal

electrodeposition

Modelling

Fundamental aspects of

electrometallurgy

Elements of electrometallurgy

Experimental approach to

electrometallurgy

Electrochemical technology

Electrowinning

Electrorefining

Electroplating

Electroforming

Electropolishing

Purification of metals

Processing technologies

Fused salt electrolysis process

Electron beam perforation

Applications

The electrometallurgy of aluminium

Aqueous solution processing
