

# CALL FOR PAPERS

**ICGMFM 2021**  
**Jan 14-15, 2021**  
**Bali, Indonesia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGMFM 2021 : International Conference on Genetically Modified Foods and Medicine is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Genetically Modified Foods and Medicine. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Genetically modified foods and organisms  
Nano-engineered foods  
Second green revolution: the role of genetically modified food  
Genetically modified crop and livestock production  
Cases for and against genetically modified food  
Corn starch and starch sugars, including syrups  
Recombinant food-grade organisms for healthcare  
Food, public health and food policy  
Food supplements and food labels  
Food quality and management  
Nutrition and nutritional management  
Current trends and research in nutrition and food science  
Changes in food components during fermentation

Food biochemistry and food microbiology  
Genetically modified foods  
Antioxidants and lipid oxidation in foods  
Bioactive constituents, micronutrients, food additives and ingredients  
Analytical methods for food components  
Enzymatic reactions in foods  
Functional foods and functionality  
Food contamination and toxic components  
Foodborne infections and diseases  
Food safety and control  
Food technology  
Food processing and packaging technologies  
Food and bioprocess technology
