

# CALL FOR PAPERS

**ICGPGT 2021**  
**Jan 14-15, 2021**  
**Bali, Indonesia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGPGT 2021 : International Conference on Geothermal Power Generation Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geothermal Power Generation Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geothermal power generation  
Geothermal resource exploration, characterization and evaluation  
Geology of geothermal resources  
Heat flow and plate tectonics  
Geologic techniques  
Hydrothermal alteration  
Volcanic-hosted systems  
Sediment-hosted geothermal systems  
Extensional tectonic geothermal systems  
Unconventional geothermal resources  
Geophysics and resource conceptual models in geothermal exploration and development  
Geophysics in the context of geothermal decision risk assessment

Geothermal resource conceptual models  
Formation properties and geophysical methods  
Geophysical methods and surveys for geothermal applications  
Gravity methods for exploration and development  
Application of geochemistry to resource assessment and geothermal development projects  
Early-phase resource assessment  
Geochemical contributions to geothermal power project design  
Geochemical tools for geothermal reservoir operation and maintenance  
Geothermal well drilling  
Wellhead design and blow-out preventer systems  
Cementing program
