

# CALL FOR PAPERS

**ICMASMT 2021**  
**Jan 14-15, 2021**  
**Bali, Indonesia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMASMT 2021 : International Conference on Morphological Analysis for Statistical Machine Translation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Morphological Analysis for Statistical Machine Translation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Morphological analysis  
Morphological analysis techniques  
Morphological modelling and description  
Morphological analysis and vocabulary  
Morphological analysis and phonological analysis  
Morphological analysis in sentence reading  
Morphological analysis of disrupted morphemes  
Theoretical approaches to morphological analysis  
Morphological analysis and synthesis

Aspects of morphological structures in linguistic analysis  
Issues concerning the morphological structure of languages  
Vocabulary development  
Morphological analysis for statistical machine translation  
Two-level model for morphological analysis  
Rules of pronunciation  
Morphophonemics  
Acquisition of linguistic rules  
Automated learning of morphological rules
