

CALL FOR PAPERS

ICMPEA 2021
Jan 14-15, 2021
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMPEA 2021 : International Conference on Mechanical Power Engineering and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mechanical Power Engineering and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mechanical power engineering
Control and safety equipment in
refrigeration and air conditioning
Advanced fluid dynamics
Advanced measurements
Advanced thermodynamics
Advanced turbo-machines
Aerodynamics
Air distribution systems in air
conditioning
Air conditioning and ventilation
applications

Automatic control of internal
combustion engines
Bio-energy
Boundary layer theory
Combustion engineering
Combustion equipment for boilers
Control of industrial furnaces,
boilers and thermal processes
Convective heat and momentum
transfer
Corrosion engineering
Economics of power generation
