

CALL FOR PAPERS

ICNRTMA 2021
Jan 14-15, 2021
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNRTMA 2021 : International Conference on Nuclear Reactor Technologies, Materials and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nuclear Reactor Technologies, Materials and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nuclear reactor technology	Integrated technology assessment methods
Nuclear reactor technologies	Fission
Nuclear reactor technology assessment	Heat generation
Nuclear reactor materials and applications	Cooling
Nuclear reactor fuel elements	Reactivity control
Site specific considerations	Electrical power generation
Grid integration	Early reactors
Nuclear plant safety	Components
Technical characteristics and performance	Reactor types
Nuclear fuel and fuel cycle performance	Classification by type of nuclear reaction
Radiation protection	Nuclear fission
Environmental impact	Nuclear fusion
Plant and site security	Classification by moderator material
