

CALL FOR PAPERS

ICRSGES 2021
Jan 14-15, 2021
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRSGES 2021 : International Conference on Remote Sensing in Geological and Environmental Sciences is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Remote Sensing in Geological and Environmental Sciences. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Environmental remote sensing
Geological and environmental remote sensing
Remote sensing principles
Environmental remote sensing and systems analysis
Remote sensing of environment
Environmental applications of remote sensing
Applications of remote sensing techniques in geological and environmental sciences
Global environmental remote sensing
Data acquisition techniques
Applications of remote sensing
Acoustic and near-acoustic
Data processing
Data processing levels

Remote sensing software
Digital image processing
Image processing techniques and software
Processing and interpretation of remotely sensed data
Earth resources and environmental remote sensing
Environmental remote sensing and modelling
Environmental remote sensing and applications
New paradigms and perspectives
Engineering applications
Future directions
Technological perspectives
Future prospects and trends
