

CALL FOR PAPERS

ICSETEM 2021
Jan 14-15, 2021
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSETEM 2021 : International Conference on Solar Energy Technology and Energy Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Solar Energy Technology and Energy Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|--|--|
| Solar energy technology | Solar power plants |
| Solar energy and energy systems | Generating methods |
| Solar thermal collectors | Conversion systems |
| Thermal energy storage and transport | Integration of solar power into energy systems |
| Solar heating systems | Project experiences related to grid connection |
| Solar cooling and dehumidification | Smart grids and solar energy |
| Passive solar heating, cooling and daylighting | IT technology for the integration of solar energy |
| Solar thermal power | Solar energy monitoring and prediction systems |
| Photovoltaics | Evaluation of rules and mechanisms for integrating solar energy in electricity markets |
| Solar photochemical applications | State-of-the-art solar resources forecasting and opportunities for improvement |
| Solar power systems | Solar integration study methodologies and data requirements |
| Solar power design | Modeling solar energy plant output variability and assessing the impacts |
| Solar power stations | Interconnection standards for solar systems |
