

CALL FOR PAPERS

ICAFNEA 2021
Jan 18-19, 2021
Bangkok, Thailand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAFNEA 2021 : International Conference on Advanced Functional Nanomaterials for Energy Applications is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Functional Nanomaterials for Energy Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Functional nanomaterials for flexible energy storage devices
Functional nanomaterials for flexible energy harvesting devices
Application of carbon nanomaterials and conducting polymers in flexible devices
Application of electrospun nanomaterials for energy applications

Various techniques to test the performance of energy storage and energy harvesting devices prepared using functional nanomaterials
Durability and stability of the energy storage and energy harvesting devices prepared using functional nanomaterials
Flexible energy harvesting devices and their challenges
