

CALL FOR PAPERS

ICTAE 2021
Jan 28-29, 2021
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTAE 2021 : International Conference on Therapeutic Antibody Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Therapeutic Antibody Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Antibody engineering	Bi specific antibodies and combination therapy
Synthetic antibody library design	Antibodies for cancer therapy
Antigen-designed antibody libraries	Human antibody gene libraries
High-throughput antibody generation	Synthetic antibody libraries
Engineering bi-specific antibodies	Antibody engineering and modification technologies
Phage and yeast display of antibodies	Antibody therapeutics and targets
New technologies and trends in antibody research	Antibody fragments and non-immunoglobulin scaffolds
Advances in antibody drug and therapy	Expression systems, glycosylation, and protein heterogeneity
Antibody design, engineering and production	Pharmacokinetics
